

System Engineer

SII Deutschland GmbH is supporting the biggest helicopters manufacturer by providing key experts in the fields of testing and simulators. Join our international team and expand your professional experience in avionics and system integration on-board the most advanced Helicopters. Several positions of System Engineers are available.

Workplace

86609 – Donauwörth, Bavaria (Germany)

Your tasks

Perform tests and qualification of the latest software release of various avionic systems. This includes:

- Perform testing of top notch avionics systems and their embedded software
- Assess the suitability of Real-Flight Simulators
- Writing test procedures and associated documentation
- Setup test benches for civilian and military helicopters
- Delivering Test Reports to the Customer

Your profile

- You have completed a degree in Engineering, preferably avionics, electrical engineering or systems engineering.
- You have already performed tests and you know some test tools and test methods.
- You have experience in system integration and are keen to dive into complex systems.
- You are familiar with DOORS software.
- You have basic programming skills with languages like C, C++ or MATLAB.
- Ideally, you are familiar with Linux and have already worked with it.
- You can demonstrate fluency in business or technical English. German or French will be a plus.
- You are open, communicative, determined and eager to become a team player.
- You are aware of the international environment and cultural differences and therefore you can demonstrate the ability to match with it.
- You are able to work autonomously, you learn by doing, report honestly and are transparent.
- Young professional candidates will be thoroughly considered.

TO APPLY

Send your CV in English to michela.ravazzolo@sii-engineering.de

Indicating the correspondence between your skills and the requirements, and possible starting date

Thank you in advance, I look forward to receiving your CV!
